

"I wish to have a tea party with animals and mermaids."

Aubree, 5 acute lymphoblastic leukaemia

Help make a difference for wish kids like Aubree

Five-year-old Aubree has a heart full of love for animals, growing up surrounded by them on her family's rural property.

When she was just three, Aubree was diagnosed with acute lymphoblastic leukaemia, beginning an intense treatment journey that kept her away from home, her animals, and the carefree moments of childhood.

Throughout months of chemotherapy, Aubree's imagination became her strength. She wished for a magical tea party with animals and mermaids, a moment of joy after so much time spent being brave.

That wish came true at Perth Zoo. Thanks to the support of our donors, **Make-A-Wish was able to create those precious memories filled with wonder, laughter and renewed hope for her and her family.**

"I wish to learn how to bake allergen friendly sweets and desserts for my family and friends."

Andrea, 8 biliary atresia, post transplant lymphoma

Help make a difference for wish kids like Andrea

Eight-year-old Andrea has always loved baking, but severe allergies meant she often missed out on enjoying treats with others.

Thoughtful beyond her years, she dreamed of learning how to bake allergen-friendly desserts so no one would ever feel excluded again.

Andrea's wish was shaped by an extraordinary medical journey, born with biliary atresia, she underwent a life-saving liver transplant as a baby, but was later diagnosed with post-transplant lymphoma, which required treatment and chemotherapy. Through it all, she showed remarkable courage and hope.

Her wish came true when she baked delicious, inclusive treats for her family with a celebrated pastry chef. She inspires others with her strength, generosity and joy.
